- Non-Harmful to Plants, Animals or Humans

What Could Be Easier to Use ?!

This is a new Fire Extinguishing device, that you have more control of, as well as several uses per bottle. You only use what you need for a fire and it does not have to be recharged or serviced. It is recommended that fire out be replaced at 1/4-1/3 original level.

The extinguishing agent in Fire Out is a UL approved extinguishing Siliconized powder, that has been tested by Allied Fire Protection Company for 10 years. The siliconized powder in Fire Out is non-toxic, non-caustic, and cleanup is very minimal.

Contents: Dry chemicals, HMIS 1-0-0 muscovite silicate, Calcium bicarbonate, Potassium Bicarbonate.
Fire Rating: B&C

Direction for use:

Store in dry place, out of fire range. When Fire out is put in desired location for fire emergency, remove red seal.

At time of use shake well 4-5 times, open snap top, and aim at base of fire as you are squeezing the mid section of the bottle.

If fire is not extinguished with one shot, repeat procedure until fire is fully extinguished.

1-2 oz's of Fire Out is expelled with every squeeze, usually enough to put out a fire with 1-3 squeezes.

The level of the product in your Fire Out bottle allows for air to float the particles in the bottle, to allow the proper projection of Fire Out in a direct application to the base of the Fire.

Use "FIRE OUT" in Your Kitchen, Car, RV, Boat, Motorcycle etc.

More Facts:

The extinguishing agent in Fire Out is a UL approved Siliconized powder with the following Fire Rating: B C

B - Flammable Liquids: Such as Gasoline, Kerosene and Oils.
