The Worlds First Telescoping ladder.

Most ladders can be carried, but these are portable in the true sense of the word. It weighs only 21 pounds and is compact at just 30 inches. You'll be able to avoid problems in elevators, stairways, or any tight spaces. With one under your arm, you can really go places. At just 30 inches when closed; expanding to 12.5 Feet when fully extended. The 12.5 foot model provides the equivalent standing height of a 16 foot extension ladder in a lightweight and easy to store package. With this ladder under your arm, you will be well prepared for every situation.

Meets applicable American National Standards Institute (ANSI) and Occupational Safety and Health Administration (OSHA) requirements. In addition, it has a 12- month warranty.
